## What's New in the Realtime Landscaping Architect?

Realtime Landscaping Architect offers different options for creating landscaping designs, with great features like sliders, graphs, buttons, and switches for adjusting your creations. Users can either import photos for editing them or start from scratch. Additionally, it is possible to prepare projects by using the design boards or directly uploading a picture of your property. Additionally, you can add objects, such as walls, planters, windows, doors, fences, and columns. Plus, you can apply 3D elements that you can position and rotate, move or resize, or make them disappear. Realtime Landscaping Architect lets you work on multiple designs at once so you can create a large landscaping project without much effort. Additionally, you can view the project in a 3D mode and easily add objects, tweak any of the measurements, and change the colors and appearances. This software provides users the ability to create landscaping designs, even if you are a beginner. Realtime Landscaping Architect is a great way to begin designing an exceptional landscaping without having to be an expert. Create realistic landscaping designs and easily create 3D objects Import images of your landscape and use them as starting point for your project Adjust the measurements and create your desired shape Create a plan with a step-by-step approach Use the design boards to create an image from scratch Create and modify objects (bricks, benches, water features, etc.) in a very intuitive way Receive feedback as you design your project Keep the results in a 3D document and export it to PDF, JPG, BMP, etc. Enhance your landscape designs with a variety of 3D models Export your landscape design to a 3D model Apply complex movements with step-by-step simplicity Edit materials, points, lines, shapes, images, and 3D shapes Import and edit 2D layers Import and place external files in your project Manage several projects at once Easy to use and intuitive to use Supports large-scale landscapes Deliver projects to your clients Print your designs Use the camera function to get a 360 degree view of your landscape design Adjust the position of the camera with great ease Choose the angle of view according to your landscaping needs Use your own pictures to create a 3D image Import images in a variety of sizes and resolutions Import images in PNG, JPG, BMP, TIFF and GIF formats Add a camera to the
