Is there a way to get another steam.ap64.dll that will work with this game? I tried a few of the other VR games (Half-life Alyx, In Death, LA Noire.). But none of them work. I tried this with another file that would work with VR games but it didn't work (Half-life Alyx) and obviously didn't work with SteamVR because I didn't get an error but just a message saying that this File not found.

How can I get another .ap64.dll file that will work with VR games? P.S. I was able to get a different version of .ap64.dll that worked in Half-life Alyx. But it didn't work with In Death, LA Noire and SteamVR.
